

COMPANY PROFILE

ABOUT

Your partner for tarpaulin solutions since 1995.

We developed and patented the first tarpaulin system with a supporting structure and movement technology. Our knowledge was then extended to new applications for the trucking sector to become a leader in the design and production of tarpaulin solutions for agricultural and industrial vehicles and for storage tanks.

We have been challenging technology and innovation since 1995 with customized solutions developed to maximize the efficiency and safety of your vehicle, protect your business and drive your success.

OUR VISION

We keep your business moving and protected.

OUR MISSION

We stand alongside your company with advanced technology tarpaulin systems that are custom-designed for your needs and developed to maximize vehicle efficiency, safety and connectivity.

OUR VALUES

GROWTH

Our innovative and efficient tarpaulin solutions help your business grow.

TRUST

As your partner and contact, you can count on us for personalized service and ongoing support.

QUALITY

Our high-quality solutions make full use of Italian excellence and the know-how of our professionals.

OUR ADDED VALUE

TECHNOLOGY

Innovative high-performance systems for vehicle automation and connectivity.

SAFETY

Load protection solutions, transportation safety and secure installation.

KNOW-HOW

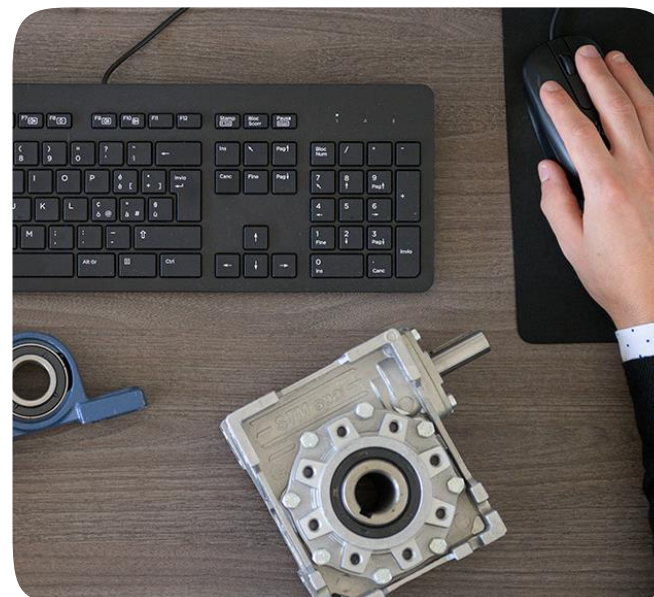

Patented technology, the quality of Made in Italy and a dedicated research and development team.

CONSULTANCY

Creation of custom tarpaulin systems to meet specific needs.

SUPPORT

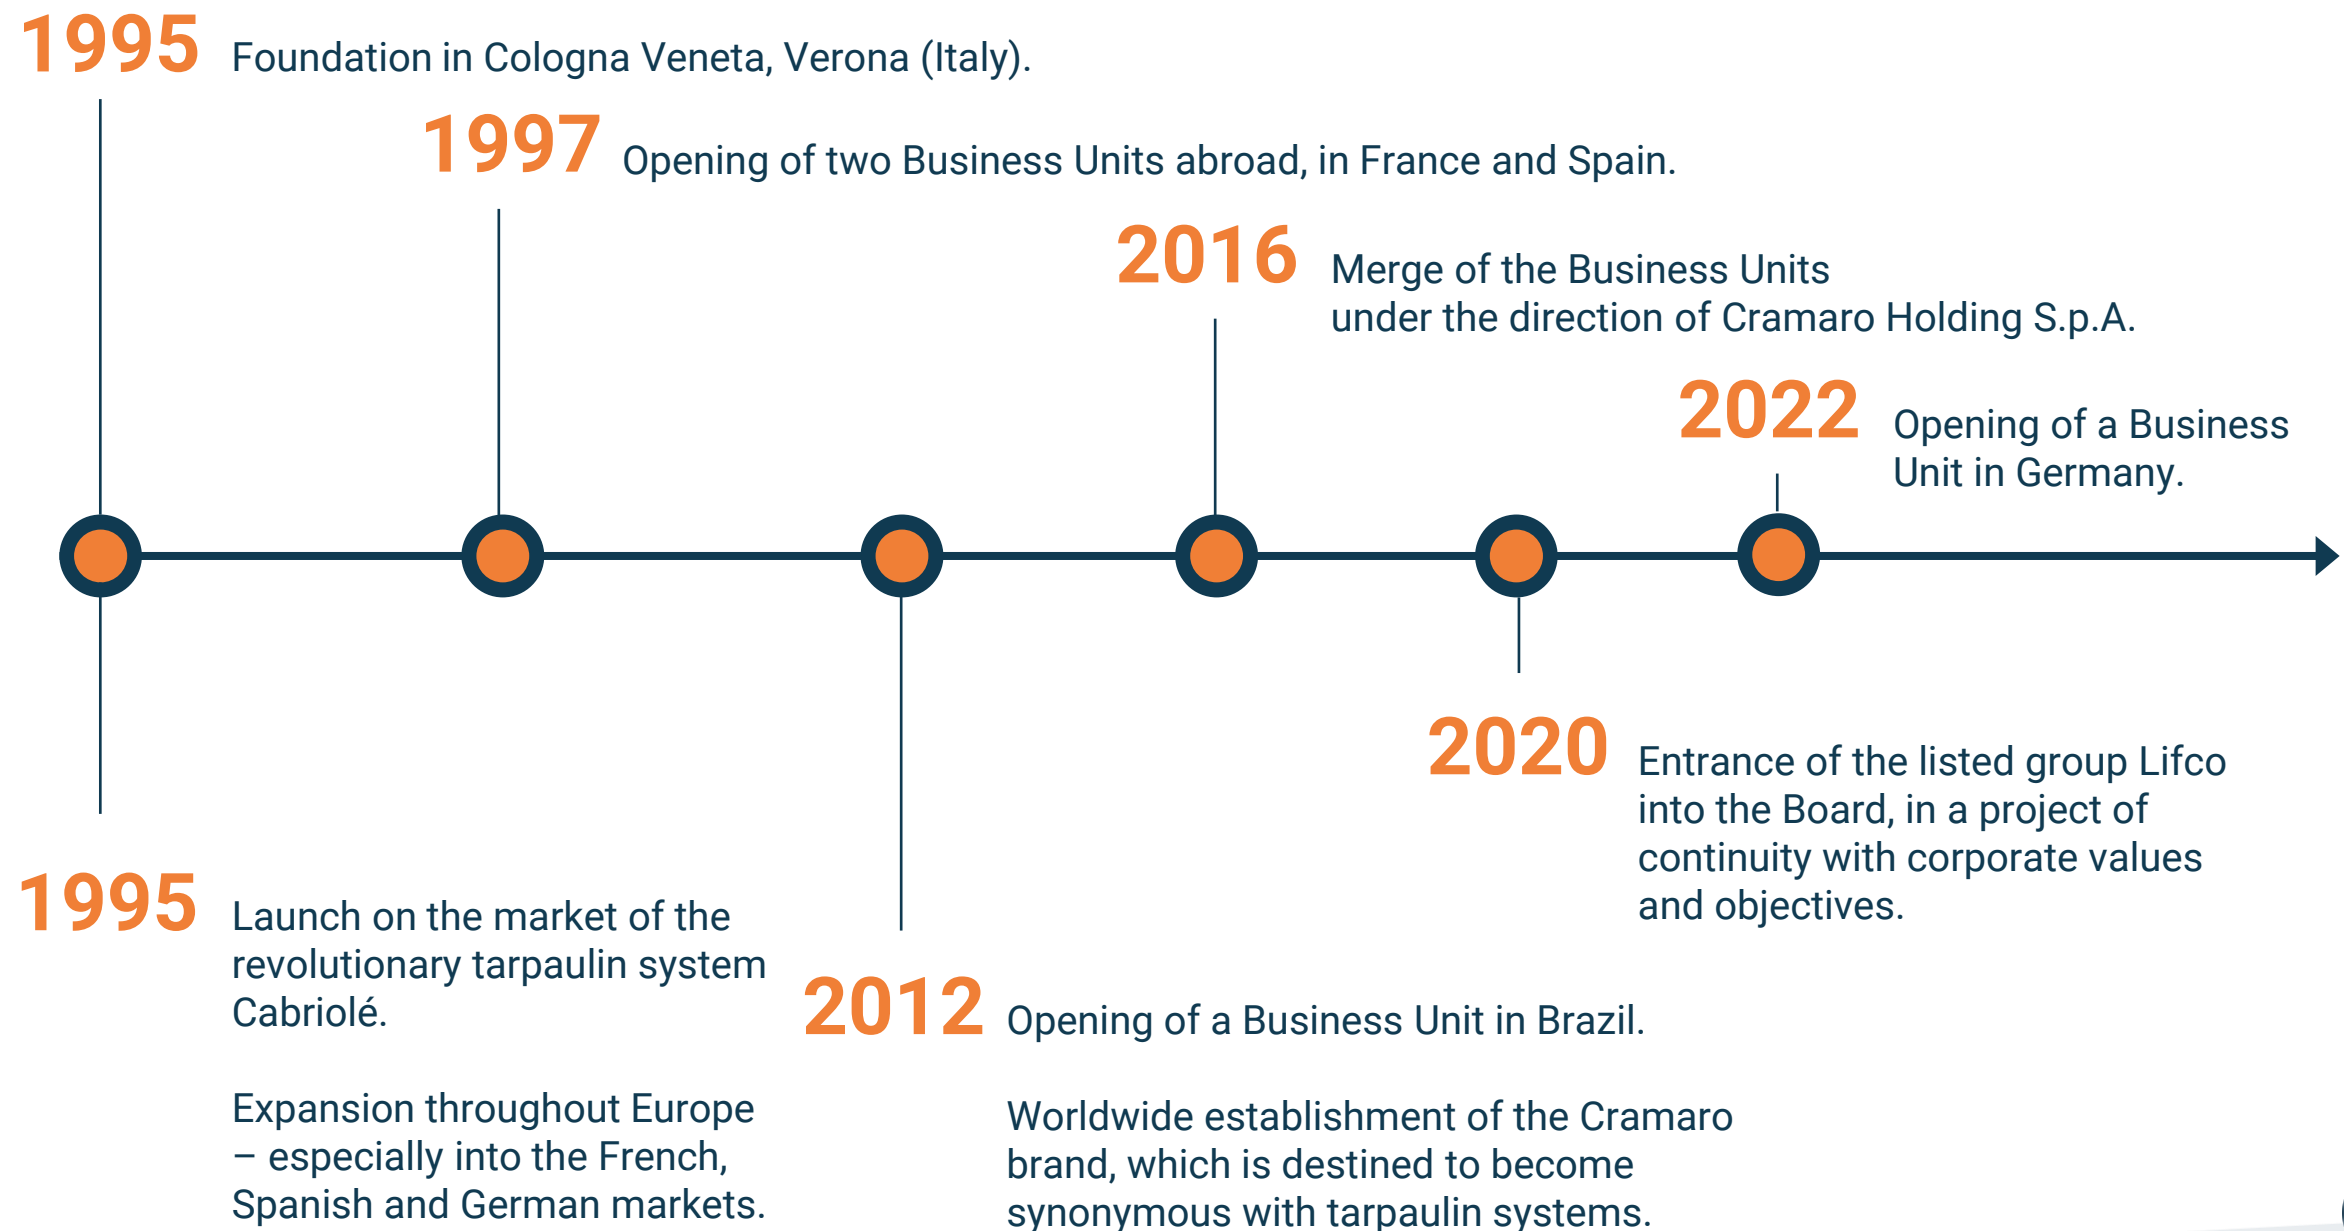

After-sales technical assistance, original spare parts and tarpaulin registration service.

OUR HISTORY

From an artisan company to a leading international industrial group.
Lasting success since 1995.

OUR KNOW-HOW

Strengthened by decades of know-how and a specialized research and development team, our work is ongoing to offer innovative and effective solutions that meet the highest quality standards.

Certifications and quality management

We have adopted a rigorous company-wide quality management system with the main objective to guarantee the highest level of service to the customer and to all interested stakeholders by working to continuously improve the effectiveness of our processes and product.

In 2013, Cramaro Tarpaulin Systems attained certification of business processes relating to the design, manufacture and installation of tarpaulin systems for industrial vehicles according to the ISO 9001 standard and in 2018 according to the new ISO 9001:2015.

OUR KNOW-HOW

More than 10 patented innovations

Our internal research and development team continuously studies innovative solutions to improve the efficiency, safety and durability of products and to increase productivity.

Among patented systems by Cramaro destined to become a benchmark in the world of industrial vehicle tarpaulins is Cabriolé, the first system equipped with a supporting structure and movement technology. Introduced on the market in 1995, Cabriolé revolutionized the trucking world by reducing risk and the time needed for loading and unloading operations.

The Over-Quick side rolling tarpaulin system with air chamber technology, the extensions integrated in the Tarp-All system for storing the tarpaulin on flatbed vehicles, the self-lifting elastic return technology of the innovative Dropmatic system represent more than 10 patents by Cramaro.

OUR PRODUCTS

The strength of our company know-how together with new technologies and attention to the customer allow us to offer a complete range of innovative tarpaulin systems developed to increase the productivity and safety of our business.

Areas of application

QUARRY/WORK SITE

Our tarpaulin solutions for vehicles used in quarries and construction sites. Manually or automatically operated from the ground to reduce risk and length of loading and unloading operations..

CONTAINERS

Our tarpaulin solutions for loading, transport and tarpaulins for containers.

THREE-WAY TIPPERS

Our tarpaulin solutions are designed not to interfere with the vehicle and to allow the side and rear walls of the container to be folded down quickly and easily.

ECOLOGY

Our tarpaulin solutions for vehicles used for the transport of solid waste or for storage tanks.

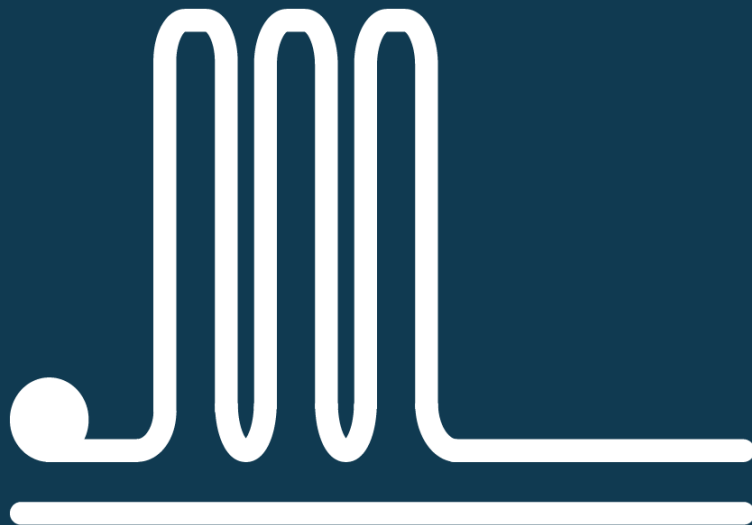

AGRO SOLUTION

Our tarpaulin solutions for agricultural containers and walking-floor trailers used for the transport of cereals, composting, silage or other types of agricultural loads.

OPERATING SYSTEMS

Our tarpaulin systems can be manually, electrically or hydraulically operated using winding or folding technology. The most suitable solution is chosen based on your needs and the vehicle characteristics on which the tarpaulin is to be installed.

FOLDING TECHNOLOGY

Tarpaulin systems featuring a bow structure which slides on the top profiles of the body.

WINDING TECHNOLOGY

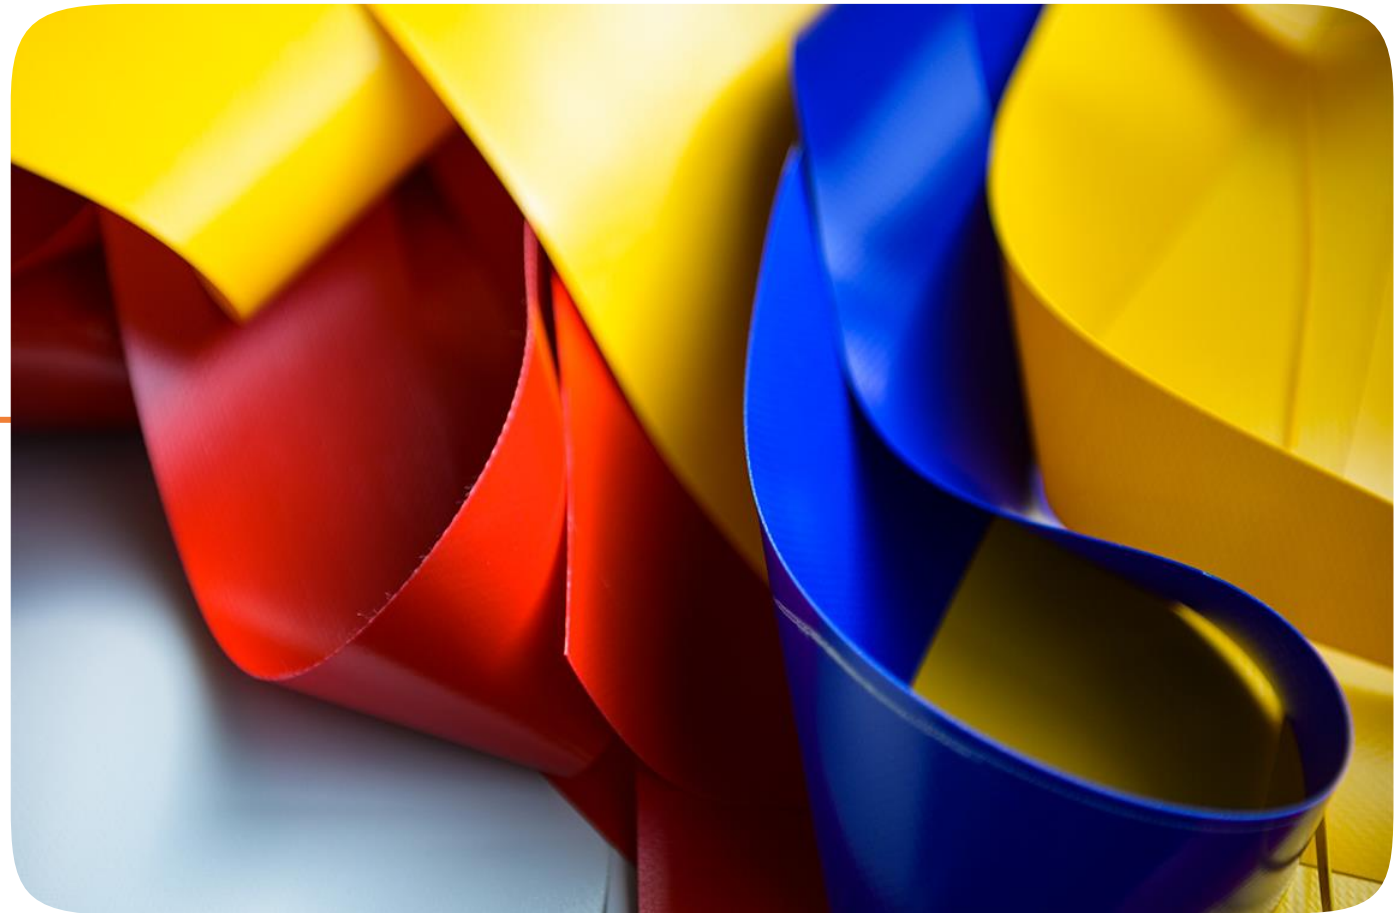

Tarpaulin systems featuring a tarp which unrolls and rolls up inside the winding roller.

DESIGN AND MATERIALS

Cramaro systems are designed to ensure maximum efficiency, speed and safety of use, with consideration for an elegant look. For this reason, we select quality materials that can lend lightness and strength to the structure and we study ad hoc design solutions that guarantee minimum bulk and maximum aerodynamics.

The same level of care is reserved for the tarpaulin constructed with quality materials and in response to specific needs: Double-coated PVC, self-extinguishing ADR PVC, polyurethane for transporting asphalt, PVC mesh and the special multilayer fabric for thermal insulation of the load.

ADVANTAGES OF OUR TARPAULIN SYSTEMS

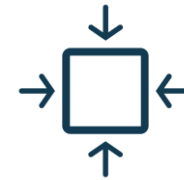

**Tailor-made system,
accessories available**

**Safe handling from the
ground**

Fast opening and closing

**Compact design for minimum
space requirements**

**Full access to the
load compartment**

**Easy to install, also on vehicle
fleets in circulation**

Cargo loss prevention

OUR CONSULTANCY

At Cramaro, we don't make one-size-fits-all tarpaulin systems. Each product is the result of carefully listening to the customer needs combined with detailed design and customization.

Personalized consultancy

Our sales network features a widespread presence in the area and is ready to assist you in choosing the solution to meet your specific needs and for advice and technical questions.

Ad hoc design

In close collaboration with the sales network, our engineers study every single request and design the most suitable customized solution for your needs and the specific vehicle specifications on which the tarpaulin will be installed. Our goal is to ensure a functional and completely integrated product.

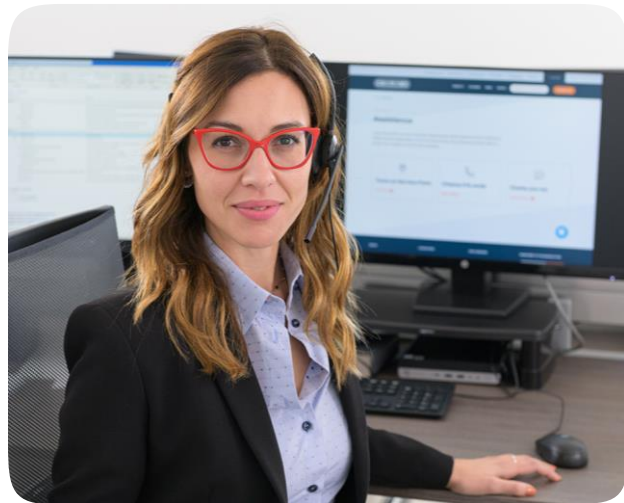

Customization

Cramaro tarpaulin systems can be customized and fitted with accessories featuring a variety of options to meet your needs. Available accessories vary depending on the product and can include side flaps for a more complete seal of the tarpaulin, rear closures with varying degrees of automation, bows of different heights to optimize load capacity and different tarpaulin material types, including an innovative multilayer fabric for thermal insulation of the load.

OUR SUPPORT

Along with high quality products, we guarantee fast and reliable qualified after-sales support. Even after the sale we are standing by to assist you with installation, resolving technical issues and with maintenance or repair questions.

Non-stop support

Our internal team of specialized operators and Cramaro authorized service points throughout the territory ensure support that is fast and knowledgeable.

Original parts

The original Cramaro parts we guarantee for repairs and maintenance are also available at our service points. Using the serial number of your product, our operators are able to view the technical specifications of the tarpaulin and recommend the best spare part.

OUR INTERNATIONAL NETWORK

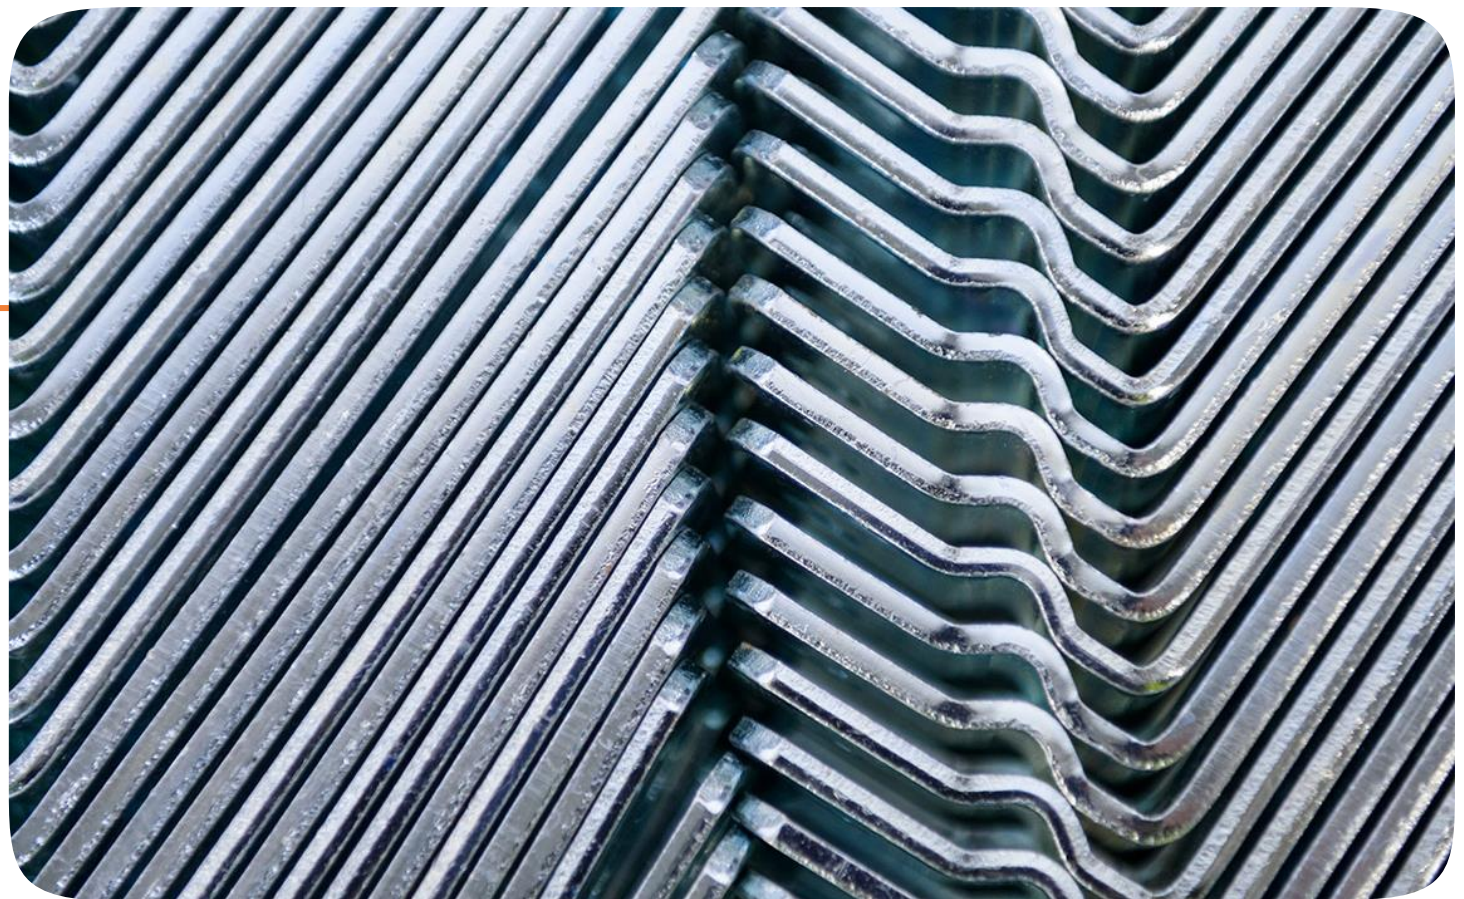

The international dimension of Cramaro Group relies on the close collaboration between Business Units and the Partner network whose strength is the ability to combine global vision with attention to the local territory and market.

Business Units

There are five Cramaro Business Units throughout the world with production and distribution functions: Italy, France, Spain, Germany and Brazil.

Business Partners

Internationally, Cramaro Group relies on valuable partners with a solid sales network and authorized service points throughout the territory.
